Plantation and Nursery

On Highway 178

4 Miles East of ORANGEBURG, S. C.

SHADE TREES — OUR SPECIALTY . . .

ALL TREES 2" cal. and up wire balled for extra support and to facilitate handling.

LOBLOLLY PINE—*pinus taeda*—We've been transplanting pines in ever increasing numbers since 1948 and we know what they can do for you. They are in great demand for cold protection for azaleas and camellias. Pines are a large volume item—no customer thinks of planting one pine tree—it's always five, ten, twenty or more.

The pines we have to offer are growing in well prepared soil—they have been cultivated, fertilized and *root pruned*. In our soil type, Loblolly Pines naturally develop a fine fibrous root system. After root pruning it almost equals that of Wax Ligustrum.

PRICES B & B, Also wired where indicated.

24"-30"75
3'-4'	1.25
4'-5'	1.75
5'-6'	2.50
6'-8'—1½"-2"	Cal. Wired	3.50
8'-10'—2"-2½"	Cal. Wired	6.50
10'-12'—2½"-3"	Cal. Wired	12.50
12'-14'—3"-3½"	Cal. Wired	20.00
14'-16'—3½"-4"	Cal. Wired	30.00

In addition to pines we have approximately 5,000 1"-3" Cal. Deciduous Shade Trees growing in prepared soil. These also have been cultivated, fertilized and root pruned. All trees quoted B & B—1½"-2" Cal. up are also wired.

DARLINGTON OAK—*quercus laurifolia*:

Variety Darlingtonia—Also known as Evergreen Willow Oak

30"-36"	2.50

CAMELLIA JAPONICA:

We have a nice lot of medium to large (3'-6') specimen camellias for special landscape needs. It's difficult to present these plants in a list of this kind because it's almost a matter of individual pricing.

CAMELLIA SASANQUA:

Too heavy selling for the last two season's has left us way short on sasanquas. About the only variety we can offer in quantity is *Mine-no-yuki*. We can, however, take care of small wholesale orders for other varieties.

Mine-no-yuki—Snow on the Mountain—Double white.

3 gal.—18"-24"	2.00
24"-30"	2.50
30"-36"	3.00

All heavy and loaded with flower buds.
